

Status Report

April 28, 2017

Information current as of April 21st, 2017

Report timeframe March 28 through April 21, 2017

Section X. 117

a. CORE Program

- i. Number of households for which CORE staff have verified a properly installed and working faucet filter: **5,676 visits to unique addresses between March 28, 2017 and April 21, 2017.**
- ii. Number of households that have refused to allow a CORE team to install a Faucet Filter: **5,889 total visits between March 28, 2017 and April 21, 2017.**
- iii. Number of Initial Visits conducted during the Reporting Period: **all Initial Visits were complete on March 4, 2017.**
- iv. Number of Follow-up Visits conducted: **44,043 total visits between March 28, 2017 and April 21, 2017.**
- v. Number of residents who called 2-1-1 helpline to make an appointment for a visit from CORE. Number of CORE team visits completed as scheduled appointments. **The State does not receive information from 211 that specifics a visit from CORE. 211 is administered via United Way.**
- vi. Total number of CORE education specialists and management staff employed during the reporting period: **193. (160 educators, 16 Coordinators, 17 Management)**
- vii. Average number of CORE education specialists scheduled daily each week of the reporting period:

Week-3/27-4/1	128
Week 4/3-4/8	130
Week 4/10-4/15	131
Week 4/17-4/22	129

viii. Export of data collected through the CORE application: **Attachment: CORE Data Report 1 and Monthly Field Report.**

Highlighted Efforts since inception:

- **CORE staff has conducted a total of 172,266 visits in Flint.**
- **CORE staff has verified the existence of a properly installed and working faucet filter (23,360) and non POU filter (680) during 24,040 visits since the beginning of their efforts in Flint.**
- **CORE teams have been refused access to install or verify a Faucet Filter during 17,660 visits since the beginning of their efforts in Flint.**
- **All CORE Initial Visits were complete on March 4, 2017.**

b. Water Delivery

i. Number of requests for bottled water delivery made each week through the 2-1-1 helpline during the reporting period:

Week 3/28-3/31	258
Week 4/1-4/7	325
Week 4/8-4/114	280
Week 4/15-4/21	296

ii. Addresses of those residents who requested bottled water delivery through the 2-1-1 helpline during the reporting period: **Attachment: SEOC 1.**

iii. Number of bottled water deliveries completed by the State during each week of the reporting period:

Week 3/28-3/31	999
Week 4/1-4/7	1,395
Week 4/8-4/114	1,542
Week 4/15-4/21	1,472

- iv. Number of bottled water deliveries during the reporting period for which 2-1-1 failed to complete a delivery within 24 hours of receiving a request:

Before the week of 4/15, procedures for tracking 2-1-1 calls that were not delivered within 24 hours were not in place. Procedures are in place now, and will be for upcoming reporting periods. In the week from 4/15 to 4/21, 5 requested 2-1-1 deliveries were not completed within 24 hours (this does not include instances of requests coming in on Saturday afternoons, as 2-1-1 teams do not operate on Sundays). Based on the tracking for the last week of the reporting period, it can be assumed that approximately 18 2-1-1 requests were not fulfilled within 24 hours throughout the duration of the reporting period.

- v. Number of households on the Access and Functional Needs list, including number of households added to and removed during reporting period:

As of 4/21, there were 1,739 households on the Access and Functional Needs list. During the reporting period, 227 addresses were added, and 214 addresses were removed from the list.

- vi. Addresses of those residents on the Access and Functional Needs list who received bottled water deliveries during the reporting period: **Attachment: SEOC 2.**

Information is compiled by entries into a database by DOL employees at the warehouse daily. At the point of the settlement agreement moving forward to advisement and clarification of reporting information, a significant backlog of information remained un-entered. Beginning the April 22 tracking period, additional staff are being employed to ensure daily information is entered, offering the ability to provide a complete picture for the next reporting period.

- c. Service Line Replacement

- i.-iii. **Reported by the City**

- iv. Total amount of monies reimbursed to or paid on behalf of the City.

- 1. **WIIN and State Match - \$0**

- 2. **Other - \$0**

- v. List of all requests for reimbursement that have been denied in part or in full:
none to date
- vi. Copies of any financial or performance auditing results: **none to date**

d. Tap Water Monitoring

- i. Results of all tap water monitoring conducted at households served by the Flint Water System during the reporting period: **Attachments: CLEAR Round 1 and Residential Sampling Report**

The attachments associated with this request are as follows:

1. Residential Sampling results from March 28 through April 21, 2017
2. CLEAR Sampling results from Round 1 collected during April 6-11, 2017

The residential sampling results workbook contains 2 spreadsheets. The first is a list of all 2 bottle (1-250mL and 1-750mL) kit results and their respective 1L calculated result. The second spreadsheet contains all 1L bottle sample results. All of these samples were submitted through our residential testing program. The 2 bottle kit and the 1L calculated results are not applicable for compliance per the Lead and Copper Rule (LCR). The 1L bottles, however, could be valid for compliance monitoring, but only if the sample meets the requirements of the LCR. One of those criteria, per direction of the EPA, is the service line at the address has to be physically verified by the DEQ or the City to qualify as a Tier 1 site. The service line composition, if known, is reflected in the columns SL Private (owned by resident) and SL Public (owned by city of Flint) on the spreadsheet. If there is not a specific material listed in the column, it is considered "unknown" at this time.

The CLEAR Sampling results list contains all 1L samples that were collected by residents enrolled in the program. The record of the service line material, both the private and public portions, was provided to the DEQ by the city of Flint. Until we can physically verify the reported material through the excavation of the service lines during Phase 4 replacements, we cannot certify these homes qualify as a Tier 1 site. The homes in the CLEAR program are slated for replacement within 90 days of submitting their sample.

Currently, our Extended Sentinel Sampling Round 8 is about to be completed. These results will be available for the next status report update. These results will include some Tier 1 sites we have previously identified and will be used in the compliance monitoring calculation per the Lead and Copper Rule.

e. Other

- i. Results of any water quality parameter monitoring conducted for the Flint Water System. Attachments: **Weekly Water Quality Parameter Monitoring 1-3, Monthly Operation Report of Water Treatment Plant, and Monthly Operation Report Weekly Update**

- ii. Formal Communications submitted to or received from EPA pursuant to the EPA Order during the reporting period: **Attachments: Service Line Project Approval Letter, Long Term Supply Options, and Long-term Water Delivery Statement.**

Comments:
 * Miscellaneous: other bottle pick ups, deliver supplies, sample bottle drop offs, and other.
 ** High Lead and Copper Visits: High lead/copper visit and repeat high lead/copper exceedance.
 *** Apr 1 - Apr 24

Visits: Any attempt to make contact at a home
 Completed [Visits]: A visit where the CORE team member spoke to a resident, unless the resident refused the visit
 Filters Distributed: Filters installed or provided
 Filters Installed: Brita Installed OR PUR Installed OR Zero Water Assembled
 Filters Existing (Not Necessarily Verified): Includes all filters that were either verified to exist, or where the resident claims they have an existing filter

Fixture Mount (POU) Filters Distributed: Brita-Installed OR PUR-Installed OR Faulty Filter Replaced with Brita OR Faulty Filter Replaced with PUR OR Access Denied-Brita Provided OR Access Denied-PUR Provided
 Non-POU (Zero Pitcher) Filters Distributed: Zero Water-Assembled OR Faulty Filter Replaced with Zero Water
 Fixture Mount (POU) Filters Installed: Brita-Installed OR PUR-Installed OR Faulty Filter Replaced with Brita OR Faulty Filter Replaced with PUR
 Non-POU Filters Installed: Zero Water-Assembled OR Faulty Filter Replaced with Zero Water
 POU Filters Existing (Verified): Brita-Existing Verified OR PUR-Existing Verified
 Non-POU Filters Existing (Verified): Zero Water-Existing Verified
 POU Filters Existing (Unverified): Access Denied-Existing Brita OR Access Denied-Existing PUR OR Access Denied-Existing Filter Unknown Brand
 Non-POU Filters Existing (Unverified): Access Denied-Existing Zero Water
 POU Maintenance/ Replacement: Serviced Brita-Now in Working Condition OR Serviced PUR-Now in Working Condition OR Faulty Filter Replaced with Brita OR Faulty Filter Replaced with PUR
 Non-POU Maintenance/ Replacement: Serviced Zero Water-Now in Working Condition
 Refuses to Use Filter: Refuses to Use Filter
 Access Denied: Access Denied-Existing Brita OR Access Denied-Existing PUR OR Access Denied-Existing Zero Water OR Access Denied-Existing Filter Unknown Brand OR Access Denied-Brita Provided OR Access Denied-PUR Provided OR Access Denied-Zero Water Provided OR Access Denied-Not Possible to Install Filter (Unverified)
 Not Possible to Install Filter: Not Possible to Install Filter
 Not Possible to Install Filter (Unverified): Access Denied-Not Possible to Install Filter (Unverified)

**MONTHLY OPERATION REPORT
OF
WATER TREATMENT PLANT**

For Month of March 2017

<u>Flint Water Plant</u> NAME OF WATER SYSTEM	<u>2310</u> WSSN	<u>Genesee</u> COUNTY
<u>JoLisa McDay</u> CERTIFIED OPERATOR	<u>F-1</u> CLASSIFICATION	
 SIGNATURE OF APPROPRIATE OFFICIAL		

TREATMENT RATE AND FILTER DATA

1. Treatment Rate, Maximum 12.13 Million Gallons Per Day
2. Treatment Rate, Approved Rated Plant Capacity 36 Million Gallons per Day
3. Average Filter Run N/A Hours, Average Head Loss N/A Feet
4. Average Filtration Rate N/A Gallons per Square Ft. per Minute
5. Maximum Filtration Rate N/A Gallons per Square Ft. per Minute
6. Average Wash Water Use N/A percent of Treated Water

CHEMICAL DATA

7. Sodium Hypochlorite on hand at CS2 1662 gal.: Estimated supply 21 days
8. Sodium Hypochlorite on hand at outstations 287 gal: Estimated supply 72 days
9. Phosphoric Acid on hand 1371 gal.: Estimated supply 53 days
9. Sodium Hydroxide on hand 1458 gal.: Estimated supply 21 days

Remarks:

Submit to: MDEQ - Office of Drinking Water & Municipal Assistance
LANSING DISTRICT OFFICE
525 West Allegan Street, 1st Floor South
(Constitution Hall)
PO Box 30242
Lansing, MI 48909-7742

LANSING

C. HEIDI GREYER
DIRECTOR

April 7, 2017

Ms. JoLisa McDay, Water Plant Supervisor
City of Flint
c/o Flint Water Plant
4500 N. Dort Hwy.
Flint, Michigan 48505

Dear Ms. McDay:

SUBJECT: Drinking Water Revolving Fund (DWRF)
City of Flint
DWRF Project No. 7421-01

We are pleased to advise you that based on our review, the 2017 Service Line Replacement and Restoration project has been approved. This approval is based on the March 8, 2017 Finding of No Significant Impact and the expiration of the public notice period.

This approval does not obligate the Department of Environmental Quality (DEQ) to fund this project. You should be aware that any assistance from the DWRF will be subject to provisions of Part 54, Safe Drinking Water Assistance, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, being Sections 324.5401 to 324.5418 of the Michigan Compiled Laws Annotated.

If you have any questions regarding this project, please contact Mr. Eric Pohan, Project Manager, Revolving Loan Section, Drinking Water and Municipal Assistance (DWMA), by phone at 517-284-5416, or by mail at DEQ, P.O. Box 30241, Lansing, Michigan 48909-7741.

Sincerely,

Sonya T. Butler, Section Manager
Revolving Loan Section
Drinking Water and Municipal Assistance
517-284-5433

Sent via Email

Dear Mr. Korleski:

In my November 30, 2016 correspondence, I identified the Flint Water Treatment Plant as the primary long-term water source for the City of Flint. Due to the multi-year construction schedule for the Flint Water Treatment Plant improvements and pipeline limitations, I also stated that it would be necessary to obtain an interim supply from the Genesee County Drain Commissioner (GCDC) after their new treatment plant was completed. Additionally, a secondary/back-up source of water was to be derived from on-site raw water reservoirs and an emergency interconnection with the GCDC.

Over the past four months, the City has undertaken extensive studies and negotiations to improve its long-term water source selection. We recognize that multiple changes in water source may result in water quality concerns. Therefore, maintaining our current water source from Great Lakes Water Authority (GLWA) will minimize these concerns and provide the highest level of public health protection.

Recent cooperation from regional stakeholders (GCDC, Karegnondi Water Authority (KWA), GLWA and the State of Michigan) has resulted in the City being able to maintain a continuous, long-term water supply from GLWA. GCDC will be installing a 42-inch transmission main parallel to the existing 72-inch transmission main that currently supplies treated water from GLWA to GCDC customers as well as the City. This will allow the GCDC to supply treated water from its new treatment plant to its customers (beginning in October, 2017) while the City continues to receive treated water from GLWA. This new GCDC transmission main will allow Flint to contract for an uninterrupted flow from GLWA and permit ownership of the 72-inch transmission main to return to the City. Additionally, a partnership between Flint, KWA, GCDC and GLWA will transfer control of Flint's portion of its KWA raw water supply to GLWA. This agreement made maintaining GLWA as the City's long-term water source economically feasible.

A summary of the water source alternatives and analysis is attached. This summary assesses each options based on its public health protection, cost, implementation risk/reliability and primary source implementation time. The long-term water supply from GLWA option (option no. 4 in the attachment) has the top ranking in all four categories.

In the November 17, 2016 First Amendment to the Emergency Administrative Order (“Order”), *Paragraph 60* was revised to require the City to “notify EPA in writing within five days if there are any changes in its initial, or any subsequent, new water source designation”. Therefore, this correspondence is official notification that Flint is designating GLWA as its long-term, primary water source with its back-up source being as interconnection with GCDC. This recommendation is subject to the public input received during the Public Participation Plan, which has been previously submitted to EPA.

Attached please also find a revised Corrosion Control Plan. This Plan outlines a two-phase investigation which is consistent with the revised water source recommendation. Phase 1 involves optimizing corrosion protection for the current GLWA source through coupon and loop studies and determining how to best transition orthophosphate doses and pH. Phase 2 addresses corrosion optimization for the long-term GCDC/GLWA blend. Continuous flow through the GCDC interconnection will be required to maintain proper water quality within the pipeline. The revised Corrosion Control Plan reflects a controlled blend for the proposed loop studies.

As co-responders to the Order, Mr. Bryce Feighner (Director – Drinking Water and Municipal Assistance Division, Michigan Department of Environmental Quality (MDEQ)) has reviewed this submittal on behalf of the State and concurs with the content of the document.

If you have clarifying questions and/or need additional information, please contact me at (810) 237-2035 or via email at kweaver@cityofflint.com.

Respectfully submitted,

Dr. Karen W. Weaver
Mayor

FLINT CCT STUDY TEST PLAN

April 13, 2017

EE&T, INC.

BACKGROUND SUPPLY ASSUMPTION

The supply plan is for Flint to stay on GLWA water permanently as the primary supply. The back-up or secondary water supply for Flint will be from the new Genesee County WTP. In order to provide County treated water to Flint, a new pipeline will be installed. So that the new County line can remain flushed, a minimum flow of approximately 0.5 mgd will be maintained in the pipeline to Flint. This County treated and supplied water will be continually blended in with the GLWA water. Therefore, in the long term plan, the Flint distribution system will be a blend of GLWA and County treated water. Flow measurement or pressure monitoring will be used to maintain the County water at no more than 5 percent of the GLWA supply.

OBJECTIVE

It is necessary to fully evaluate the corrosion control treatment (CCT) required for a blend of County and GLWA water prior to the County water being introduced to the Flint system. The County treatment system may use a different coagulant than the GLWA delivered water. Further, Flint currently has an orthophosphate residual leaving the plant of about 3.5 mg/L (maintaining above 3.1 mg/L in the distribution system) and a pH goal of about 7.4 leaving the plant. At this point it is not known what CCT conditions the County will set, but they could be different than current Flint water. *One key objective therefore is to determine proper CCT when the two waters are blended.*

When Flint switched back from the Flint River supply to the GLWA supply, it was necessary to quickly set CCT conditions. Using theoretical solubility relationships and experience, EPA selected a minimum orthophosphate residual in the distribution system of 3.1 mg/L. Time constraints did not allow for a robust test to determine the ideal orthophosphate dose or pH. *Therefore, a second objective of this CCT study is to determine the optimal CCT for GLWA water.* These optimal GLWA conditions will also be used to better set the blend conditions, especially since the blend will be no more than 5 percent County water and is therefore GLWA water dominant.

CCT STUDY PLAN OVERVIEW

Phase 1. At the Flint WTP there are 16 pipe segments available in 4 loop rigs. These test rigs were assembled by EPA and EPA has stabilized the pipe segments on existing Flint distributed water. Therefore, these pipes can be used immediately to evaluate pH and the appropriate

orthophosphate dose since they are already stabilized. By using these pipes for testing, an optimal pH and orthophosphate dose going forward for GLWA water can be selected.

Phase 2. Having determined in the existing loops the best pH and orthophosphate dose for GLWA water, those conditions can serve as a starting point for testing the 5 percent blend of County treated water. Likely the proper course of action for the final treatment will be to blend the County and GLWA water at the Flint WTP site, where the blended water could then be adjusted to the CCT conditions found to be optimal for the blend.

SCHEDULE CONSIDERATIONS

Phase 1. The existing loop system at the WTP will be used for orthophosphate dose and pH evaluations as soon as possible after contract finalization and loop set up; approximately June 2017. The pH and orthophosphate evaluations on GLWA water will continue for 6 months.

Phase 2. After the 6-month testing on GLWA water, testing will be conducted at a 5 percent County treated water blend on the already stabilized pipes. Testing of the blend conditions will take place for 3 months.

TEST PLAN OVERVIEW

Phase 1. The first phase study will be used to evaluate pH and orthophosphate dose on the existing rigs using pipes that have been already been equilibrated with Flint water (pH in the 7.3 range and orthophosphate of about 3.5 mg/L as PO₄ which is the approximate residual at the plant site).

Note that there will be coupon studies conducted before the loops start that may inform or alter the loop study plan.

Two pH values will be tested at four (4) orthophosphate doses. Duplicates will be conducted for each test condition, which will use all 16 of the available pipes. The two pH values selected are 7.5 and 7.2. The higher pH (7.5) was selected as being an almost ideal pH based on theoretical and experimental solubility curves, while the lower pH value (7.2) was selected to represent a lower bound for orthophosphate performance. Therefore, if similar performance is achieved by both pH values then the distribution system can be allowed to drift down to pH of 7.2. However if pH 7.5 provides better control of lead solubility, that will set a target at a higher pH. In the latter case, additional pHs may be evaluated along with the Phase 2 work to better define pH conditions.

The four orthophosphate doses will be:

1. The current Flint orthophosphate residual goal of 3.1 mg/L. This dose will represent current practice as well as the high end dose. The residual used might actually be the

- 3.5 mg/L that is available at the plant site or GLWA water might be adjusted up to 3.1 mg/L.
2. The lowest orthophosphate dose tested will be GLWA water as received which has a residual of about 1 mg/L. This dose will represent the lowest dose tested.
 3. Two doses in-between the range of 1 to 3.5 will then be also evaluated; planned as 1.75 and 2.5 mg/L.

This first phase of the study will recommend how to transition the current Flint-treated GLWA conditions to the optimal pH and orthophosphate conditions.

Phase 2. During the second phase, the pipes tested in the first phase will be used. The pipes will receive 5 percent County treated water and 95 percent GLWA water. The blended water will be evaluated at the 4 orthophosphate doses tested above using the corresponding pipe. For example, the pipes stabilized in Phase 1 at an orthophosphate residual of 2.5 mg/L will receive blended water treated to 2.5 mg/L orthophosphate residual. This will follow for all four orthophosphate residuals used in Phase 1. However, if the first phase finds some doses were not acceptable, the dose may be eliminated or modified. One pH condition will be tested in Phase 2 as determined from the first phase. Tests will be in duplicate for a total of 8 pipe loops. The remaining pipes could be used to better refine pH or orthophosphate dose.

These results will allow for a final selection for CCT conditions to be set for the normal situation of County and GLWA blended water.

CITY OF FLINT

Statement of Principles

Dr. Karen W. Weaver
Mayor

Long Term Water Delivery to the City of Flint

The below represents a statement of the structure for a set of inter-related transactions that will comprise an overall agreement resulting in primary and backup water for the City of Flint and system improvements for all parties. The signatories agree to work in good faith to speedily agree to the necessary legal documents (in the form of an overall master agreement with each individual agreement as an exhibit to that master agreement). They further agree to use their best efforts to secure all authorization or approvals required by the entity's policies, ordinances, and governing law for those agreements from all governing bodies necessary to put these agreements into effect as soon as is practicable.

1. The Great Lakes Water Authority (GLWA) will provide long-term wholesale finished water services to Flint, with pricing for the services that treats Flint similarly to all other GLWA wholesale model contract customers, including access to Water Residential Assistance Program funds to assist low-income customers. GLWA will receive the right that Flint has to purchase raw water through the Karegnondi Water Authority (KWA) and credit Flint in like amount to the debt paid during the contract period.
2. Certain trust arrangements will be put in place for ease of flow of funds from Flint to GLWA and the KWA in normal operation. Additionally, in the event Flint does not fully meet its obligations to the KWA, the Genesee County Drain Commission (GCDC), and GLWA, an alternative trust will come into operation. That trust would receive all Flint customer collections and ensure a flow of funds to meet obligations to the KWA, GCDC, and GLWA. Additionally, Flint will provide a customer security deposit of \$3.75M with GLWA, for no less than two years and no greater than six years (as long as timely payments are made and agreed upon performance objectives met). KWA has a conditional right to access the customer security deposit under certain circumstances.
3. GLWA will provide short-term wholesale finished water services to the GCDC until the GCDC water treatment plant is operational and servicing GCDC's customers, with pricing for the services that treats GCDC similarly to all other GLWA wholesale model contract customers.
4. GLWA and the GCDC will provide one another with reciprocal backup water services. The price for backup water services will be established through an agreed upon detailed pricing methodology in the contract and it will be the same for both parties.
5. The State of Michigan (State), through its Department of Environmental Quality (DEQ), will provide a grant in an amount of \$7.5M to the GCDC for installing a 42-inch transmission main parallel to the existing 72-inch transmission main that currently supplies treated water from the GLWA to GCDC customers and Flint. This will allow GCDC to supply treated water from its new water treatment plant to its customers on or after October 2017. The 72-inch transmission line will be returned to Flint's ownership.
6. The State will provide assistance, in compliance with all existing laws, to GCDC, Flint and the KWA in obtaining refinancing of the 2016 KWA bond issue and in completing the approval process for the GCDC to use its water treatment plant.

7. Flint will build a new supply connection from the end of the GCDC service system north of Flint to the Flint water system to provide a backup water supply. Flint intends to utilize WIIN funding to complete this project.
